TOM 3R - MINI SORTING STATION

Are ice and beverage residues weighing heavily in your waste bags? Do you want to encourage your guests to sort out bottles and aluminum cans from the rest of the waste? If the answer is yes, TOM 3R is the right solution for you!

High capacity sink in stainless steel

TRIPLE FUNCTIONS IN ONE

TOM 3R is a multi-function unit. 3R stands for
Reduce: liquid separation for reduced weight of waste bags.
Return: the unit can be used as a tray holder.
Recycle: collection of beverage containers.

REDUCE

TOM 3R is equipped with a generous sink for liquid and ice. It is drained through a tube into a tank on wheels or can be connected directly to the regular sewage system for disposal. You and your staff can benefit from significantly lighter waste bags when the liquid is separated. The main advantages are less frequent bag switches, less heavy lifting and easier transportation of the bags.

RETURN & RECYCLE

The upper shelf is designed to serve as a tray holder and TOM 3R also has an opening and a separate bin for collecting bottles and/or aluminum cans. Turn waste into money, when you collect recyclable beverage containers!

The durable laminate finish is easy to wipe off and keep clean.

MODERN DESIGN

TOM 3R has a slim design with nicely rounded shelves. It comes in a discreet gray shade but can easily be wrapped to harmonize with your environment.

DIMENSIONS		TECHNICAL DATA			
HEIGHT	WIDTH	DEPTH	WEIGHT (EMPTY BIN & TANK)	LIQUID TANK CAPACITY	BOTTLE & CAN BIN CAPACITY
1100 mm (3'8")*	570 mm (22")	633 mm (25")	45 kg (99 lbs)	20 l (5 US gal)	60 l (15 US gal)

* adjustable feet
