

# ORWAK MULTI 9020S

Create your own mini recycling station with the ORWAK MULTI 9020S! This multiple-chamber solution provides sorting and compaction of different types of materials in one unit! The chambers allow for a lot of material and the system can easily be extended by adding additional chambers.

**MULTI-  
CHAMBER**

**440** LBS

**BALE WEIGHT  
CARDBOARD**

## ORWAK BENEFITS

### **MORE PRODUCTIVE USE OF TIME**

Less time spent on waste handling, more time for your core activities!

### **MORE SPACE & ORDER**

Our balers rapidly minimize the space the waste takes up, keeping aisles free and tidy.

### **LESS COSTS, MORE VALUE**

More compaction = less waste volume to transport. Fewer transports required results in lower transportation costs and reduced CO<sub>2</sub> emissions. Sorting at source yields a higher quality of waste material for recycling.

## WHY ORWAK MULTI?

- Sorting and compaction of several waste types at source
- Top-loading of the material in open chambers
- Total freedom to increase capacity by adding additional chambers

# ORWAK MULTI 9020S

Multiple-chamber solution

## MINI RECYCLING STATION

This is a top-loading, multi-chamber solution that forms a mini recycling point. By using one chamber for each type of material, it is easy to sort and compact materials at source.

## HIGH-CAPACITY SYSTEM

The 9020S is a powerful machine with large chambers and generous loading apertures. It provides effective volume reduction of large amounts of recyclables.

## EXTENDABLE SYSTEM

It is easy to add additional chambers to extend your sorting and compaction system, and increase its capacity further. When your business expands and your needs change, let your waste handling system grow at the same pace!

## EFFICIENCY

Whilst the baler compacts the material in one chamber, the other is open and ready to be fed with more material!

- Convenient top-loaded setup
- Bale indicator
- The press force can be regulated individually for each chamber depending on material
- Safety brake

## ORWAK MULTI 9020S IS OPTIMIZED FOR:

### PAPER

- Paper sacks
- Cardboard
- Shredded paper

### PLASTIC FOIL

- Shrink film
- Plastic bags

### METAL CANS

- Food cans
- Paint cans

### OTHER METALS

- Steel straps

### PLASTIC CONTAINERS

- PET bottles

## SAFETY BRAKE AS STANDARD

The operator needs to push the buttons on the handles and have a two-hand grip to slide the top unit sideways. Releasing a button, brakes the press head and makes it harder to move. This feature improves safety at work.

Complies with the EN 16500:2014 safety requirement standard for vertical balers

## DIMENSIONS & SPECIFICATIONS

DIMENSIONS					
A	B	C	D	E	F*
8'1"	98"	38" (45")	86"	55"	6'3"
*Including strap holders			*Transport height		
ENERGY CONSUMPTION					
STANDBY MODE			MAXIMUM OPERATION ONE HOUR		
2.7 W/H			800 W/H		

TECHNICAL SPECIFICATIONS
